

Google Apps: easy, collaborative workgroup communication with Gmail and Google Calendar

Messaging overview

Google Apps messaging tools include email, calendar and instant messaging solutions that help employees communicate and stay connected, wherever and whenever they work. These web-based services can be securely accessed from any browser, work on mobile devices like BlackBerry and iPhone, and integrate with other popular email systems like Microsoft Outlook, Apple Mail, and more. What's more, Google Apps' SAML-based Single Sign-On (SSO) capability integrates seamlessly with existing enterprise security and authentication services. Google Apps deliver productivity and reduce IT workload with a hosted, 99.9% uptime solution that gets teams working together fast.

Gmail

Get control of spam Advanced filters keep spam from employees' inboxes so they can focus on messages that matter, and IT admins can focus on other initiatives.

Keep all your email Manage your email. 25 GB of storage per user means that inbox quotas and deletion schedules are a thing of the past.

Integrated instant messaging Connect with contacts instantly without launching a separate application or leaving your inbox. No software required.

Built-in voice and video chat Voice and video conversations, integrated into Gmail, make it easy to connect face-to-face with co-workers around the world.

Find messages instantly Powerful Google search technology is built into Gmail, turning your inbox into your own private and secure Google search engine for email.

Protect and secure sensitive information Additional spam filtering from Postini provides employees with an additional layer of protection. Centrally-managed content filters enable companies to create custom inbound and outbound policies to keep sensitive information safe.

Mobile integration Email and IM are easily accessible on the iPhone, BlackBerry, or other smart phones through client applications or web interfaces optimized to run on mobile browsers.

Message Recovery and Archiving Administrators can search and recover email with 90-day archiving by Postini. Retention can be extended to meet regulatory and discovery needs.

ABOUT GOOGLE APPS

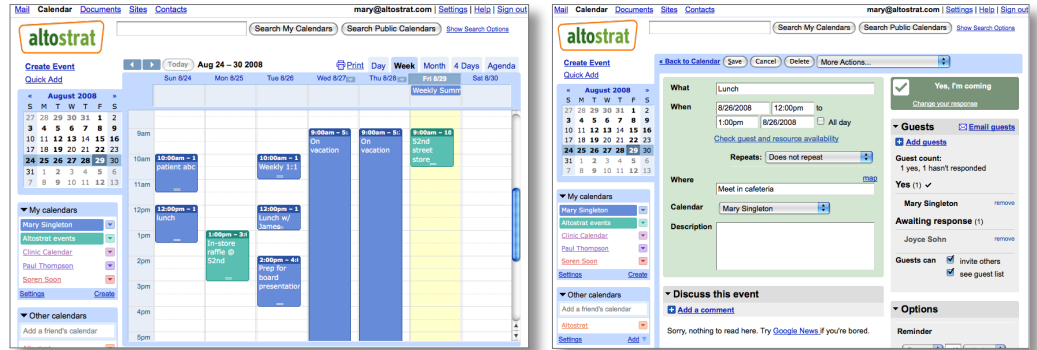

Google Apps is a suite of applications that includes Gmail, Google Calendar (shared calendaring), Google Talk (instant messaging and voice over IP), Google Docs & Spreadsheets (online document hosting and collaboration), Google Sites (team site creation and publishing), Start Page (a single, customizable access point for all applications), Google Video, and Google Security & Compliance. Google Apps offers editions tailored to specific customer needs, including the Standard Edition (ideal for family domains), Education Edition (K-12 schools, colleges and universities) and Premier Edition (businesses of all sizes).

Contact LTech for more information on migrating to Google Apps.

Visit LTech at:

Migrate existing email Built-in migration tools let you easily migrate email from legacy systems into Google Apps email accounts.

Google Calendar

Easily schedule appointments Overlay multiple calendars to see when people are available. Enter meeting details, and Google Calendar sends invitations and updates RSVPs.

Share project calendars Calendars can be shared company-wide or with select co-workers. Users can select from a range of permission settings when sharing calendars with others – choosing who sees event details or makes calendar changes.

Embed calendar on web pages Embed a daily, weekly or monthly calendar in Google Sites or on any web page; no programming required.

Publish calendars Publicize external company events by publishing a calendar and making it searchable to the world in the Google Calendar gallery.

Mobile access View event details, add new events, and invite guests, using mobile devices like BlackBerry and iPhone. Receive calendar notifications via SMS.

Additional details

| Feature | Details |
|---|--|
| Applications included | Gmail, Google Calendar, Google Talk, Google Docs (word processing, spreadsheets, and presentations), Google Sites, and Google Video. |
| Gmail, Google Calendar, and Google Talk Uptime | 99.9% uptime SLA for Premier Edition customers. |
| IMAP and POP | Integrate email with popular programs like Apple Mail and Microsoft Outlook. |
| Administrator control panel | Usage reports, disk space usage, account provisioning (no preset account limit). |
| Provisioning API | Manage user accounts and synchronize Google Apps users with your own user management system. |
| Reporting API | View and generate reports (e.g. usage data, user information and stats) using your own reporting system. |
| Authentication | Google Apps provides a complete and secure user authentication system for all applications. For enhanced security, you can use a SAML-based Single Sign-On (SSO) service, which allows you to tie your own authentication system to the Google Apps web-based login. |
| SSL | Automatically enforce Secure Socket Layer (SSL) connections when your users access Gmail, Google Calendar, Google Docs, and Google Sites. |
| Security | SAS 70 Type II audited. |
| Solutions Marketplace and third party applications and services | Connect to vendors whose solutions integrate and extend Google's messaging, collaboration, and enterprise search products. |
| Mobile access | Access Gmail, Google Calendar, Google Docs, and Google Sites from mobile devices like the BlackBerry and iPhone. |
| Sharing controls | Set policies for user-sharing privileges for Google Docs, Google Sites, and Google Calendar, including limiting the ability to share content outside of your domain. |
| Advertisements | Display of relevant, text-based advertisements is optional and turned off by default. |
| Online support resources | U2U Group for administrators; Help Centers for administrators and users. |
| 24/7 assistance | Email and phone support for system critical issues. |
| Supported browsers | Internet Explorer 7, Mozilla Firefox 3, Safari 3.1, and later versions of each. |
